The rest of the story is a familiar one: the handful of deputies sent up by Sheriff McCleary were surrounded by the mob and forced to leave town, and

landed on our property for the protec-tion of our plant."

"Why did the Carnagie company call upon the Pinkertons for watchmen

to protect their property.

We did not see how else we could have protection. We only wanted them

for watchmen to protect our property and that the workmen we would take to

Homestead—and we have had applica-tions from many men to go there to work—be not interfered with.

The facts connected with the en-agement of the Pinkerton men are

these. From past experience, not only with the present sheriff but with oth-

ers, we have found that he has been unable to furnish us with a sufficient

number of deputies to guard our property and protect the men who were

anxious to work on our terms. We felt that for the safety of our property and in order to protect our workmen it

was necessary for us to secure our own watchmen to assist the sheriff, and we know of no other source from which to obtain them than from

Pinkerton agencies, and we brought

the watchmen here as quietly as possi-ble, had them taken to Homestoad at

an hour of the night when we hoped to

have them enter our works without any interference whatever, and with-out meeting any body. We proposed

to land them on our own property and all our efforts were to prevent the pos-sibility of a collision between our former workmen and our watchmen.

"We are to-day barred out of our

property at Homestead and have been since the 1st of July. There is nobody in the mills up there now; they are standing a stient mass of machinery, with nobody to look after them. They are in the hands of our former work-

"The question at issue is a ver grave one. It is whether the Carnegie company or the Amaignmated association shall have absolute control of our plant and business at Homestead. have decided, after our numerous fruit conferences with the Amalgamates ociation officers in the attempt to adjust the existing differences and diffi culties, to operate the plant ourselves I can say with the greatest emphasi that under no circumstruces will we have any further dealings with the Amalgamated association as an organi-zation. This is final. The Edgar Thomson steel works and our estabshment at Duquesne are both operate by workmen who are not members : the Amalgamated association with the greatest satisfaction to ourselves and to the unquestionable advantage of on employes. At both of these plants the work in every department, goes on unnterrupted. The men are not har-assed by the interference of trades inless officials, and the best evidence that their wages are satisfactory is shown in the fact that we have nove had a strike there since they began

say that it is not a matter in which the protective tariff is involved, and every intelligent man, whether he be manufacturer or employe, is aware of the fact. It is, however, a question as to whether or not the proprietors or its workmen will manage the works."

The Other Side of It, by a Responsible Eyewitness. Pittseumon, Pa., July 8.—Capt. William Rogers, who was thought to have been one of the alian at Homestead, returned to this city on the Little Bill. The following is his account of the trip:

"I had contracted to tow the two barges to Homestead and was on hand with the temperature." I take Bill her highly

"The sheriff visited Homestead and talked with the advisory committee. It was asked that they be permitted to appoint men from their number to act as deputy sheriffs; in other words, the men who were interfering with the exercises of our corporate rights, preventing us from conducting our business affairs, requested that they be clothed with the authority of deputy sheriffs to take charge of our plant. be quiet.
"Everything went all right with us
until we got below Lock No. 1, when
the Tile, which was towing one of the barges, broke one of her cams. She blow her whistle and the Little Bill went back, relieved her of her barge and went through the look with bot barges. When we reached Homestea there seemed to be considerable excit

We tried to make a landing then My men went make a landing then My, men went forward to tie up to the shore barge, while the Pinkerton men shoved out a landing plank. The people on the bank were awfully excited, but the men under me and the Pinkertons were perfectly quiet and I kept urging them to remain so. them to remain so.
"In the midst of it all, the Pinkerton

captain swore vengeance upon any mar who would attempt to shoot, although the balls were flying from the other side. I state positively that the men on shore commenced the firing By this time the landing plank had been gotten off. As the men were about t gotten off. As the men were about to land, a man with a revolver made a dash for it, firing all the while. The Pinkertons tried to push him back and succeeded, when two more followed, overpowering the few Pinkertons. The people fired directly at the Pinkertons, they fired all over the barges and at the Litte Bill. Then the Pinkertons opened outless fossible were the second outless fossible wer opened quite a familade upon the peo-ple. As they did this they received a deadly fire from over their heads. a deadly fire from over their heads. Some people had stationed themselves upon the water tower and shot right down. He was the first Pinkerton to fall. Several of his men rushed out to where he lay to his men rushed out to where he lay to is men rushed out to where he lay efend him. He was then carried into

HABRISHURG, Pa., July 8—Late yesterday afternoon Gov. Pattison received the following telegram from Sheriff McCleary at Pittsburgh: "Last night I went to Homestead, accompanied by officers of the Ameleonant of accordance officers of the Amalgamated association officers of the amargamates association, and succeeded in bringing away the guards sent by river who had surren-dered to the rioters. The arms of the guards, who numbered about 300, are all in the possession of the rioters "Today overything is quiet, but the works are in possession of a large force of the strikers. Any attempt on the part of the civil authorities to disposess them will be met with resistance. Last evening I issued a general sum-mons to citizens to attend thus morning at 9 o'clock to aid in restoring order. and falso issued a large number of notices to individuals. The result up to noon to-day is, thirty-two persons have reported, all without arms They have been notified to appear to-morrow at 9 o'clock, and I have ssued additional notices to individual ning them to appear at the same time These notices will be served to-day. I am satisfied from present indications that it will be imossible to obtain any considerable orce; and the force thus gathered with out discipline and arms, will be of n se whatever. As soon as any effort i made to take possession of the propert another outbreak will occur"

esterday's Conference on the Wester PITTSBURGH, Pa., July 8.—Two cor ferences were held yesterday between the manufacturers and the amalga-mated officials with reference to the western scale. Adjournment was taken at 6 o'clock until 2 p m. to-day. At the adjournment the prospects of a at any time since the negotiations were opened It was learned that certain parts of the scale, on which the manu-facturors had asked modifications, were

presented and a number of items were favorably considered by the amalgamated men, but not finally approved It is stated on reliable authority that the differences will very likely be compromised by a scaling down of the wages of the heaters and rollers as a concession on the part of the manufacturers It has been claimed for years that the rollers and heaters have been receiving wages too high in proportion to other iron workers, the maintenance of which has been at many times the bone of serious contention between the

manufacturers and their employes.

HOMESTEAD, Pa., July 8 —A matter now under discussion is the probablo at and to be taken by President Frield. There is not a man here who believes the chairman of the great Carnegie interests will ever give his consent to en gage the services of those who now are idle. There was at one time a probability that the men would be taken back, but now it is conceded positively certain that no man now will be given work Should Frick and the other of ficials insist on refusing to take back their old employes it will be a hard blow to Homestead The majority of the men have families and own the houses in which they live Then again the immensity of the plant and peculiarity of the work is such that it would be difficult for 4,000 steel workers to leave here and secure work elsewhere

A Fool's Errand, but the Sherifi Will Attempt to Do His Duty. PITTSBURGH, Pa., July 7.—Sheriff Mc-Cleary was very much worried to-day "What are you going to do?" "What can you do?" and various other ques-tions were propounded to McCleary, and in the meantime clerks were busy and in the meantime clorks were busy sending out notices to citizens, several hundred in number, calling on them to act as a posse attending the shoriff in keeping the peace at Homestead Up to 5:30 o'clock this evening the responses numbered thirty-six. The sheriff said to a reporter: "I will go up to Homestead to-morrow with a posse What time the train will leave, I cannot say. But I will go in the posse What time the train will leave, I cannot say But I will go in the morning sometime, and I do not antici-pate any further trouble at Hone-stead."

Missing Pinkerton Men.
HOMESTEAD, Pa, July 8.—The Homestead workmen are puzzled as to the whereabouts of at least five Pinkerton men. It is considered a certainty that this number either met death instantly are ware as budle, indured that they or were so badly injured that they would have died in few hoursand in all probability sought a grave in the waters of the Monongahela It is certain waters of the monoganess line certain that two deputies were drowned, but although a diligent scarch has been made along the over shore, no trace of them can be found.

CHICAGO, July 8.—William Pinkorton lectures that Carnagie has decided to close the mill at Homestead until new men are allowed to go peacably to work, and hold the county responsible for what damage may result from the strike. In other words Carnagle will attempt to destroy the union now wag-ing war against him Mr. Pinkerton declares that his men have been withdrawn and that a great lock-out has een begun

A Russian Discovery in Central Asia. The Russians have made a singular discovery in Central Asia. In Turkes an, on the right bank of the Amou Paira, in a chain of rocky hills near the Rokharan town of Karki, are a number of large caves, which upon examination were found to lead to an under ground city, built, apparently, long be-fore the Christian era. According to the efficies, inscriptions and designs upon the gold and silver money uncerth-ed from among the ruins, the existence of the town dates back to some two centuries before the birth of Christ. The edifice contains all kinds of domestic utensis, pots, urns, vases and so forth.

The high degree of civilization attained by the inhabitants of the city is shown by the fact that they built in shown by the fact that they built in several stories, by the symmetry of the streets and squares, and by the beauty of the baked clay or metal utensils, and of the comaments and coins which have been found. It is supposed that long centuries ago this city, so carefully concealed in the bowels of the earth, provided an entire population with a refuge from the incursions of nomadic savages and robbers.—Detroit Free Press.

mportant Changes on the Illinoi Central Lines Just Made. A large number of important change

n the running rules of trains on the Illi-

ois Central road have just been made going into effect yesterday. All the abers of trains have been changed the trains going north having even num pers and those south being numbered with odd figures. These changes as nade so as to bring the trains on this division to correspond with these on the division below Centralia. A new code of signals has also been made, both in th and in the whistle and signals used by trainmen. These various changes are nade in accordance with the rules of the ssociation of railroad companies in the United States and brings the Central nto the union, that road having preriously used many methods different from other lines. All station agents and employee are hereafter to wear uniforms The many changes in running orders have considerably befuddled even the oldest employes of the road.

BATTLE OF RIVAL STEAMERS

The Illinous River the Scene of

There is liable to be a bloody warfare n the Illinoùs river almoet any day. For long time there has been a bitter rivalry between the steamers Borealia Rex, running between Peoris and Henaspin, and the city of Peoria, plying be ween Peorla and Henry. The Rex came into these waters two years ago. She is a fast steamer, and has beaten the Resme, a boat formerly owned by Capt. leave for California. York of the city of Peoris, on numerous occasions. The Season for Dog Disterni This spring season is very trying for house bred deggies, and unless great care is taken of their exercise and diet they are pretty sure to have a touch of distemper. This will promptly announce itself by running at the eyes and nose and the small quadruped should be at once taken to the doctor. No home reatment is safe, and a good doctor will cure him in two days and prevent a re-lapse. Keep vermifuge comfits always by you and give him one now and then as a preventive.—New York Press

A Fault in the New Coins "There is a very serious defect in the new silver half dollar that few peop appear to have discovered," said Milto Everett, of San Antonio, Tex. "The new coln is nearly as brittle as steel. hard blow from a hammer breaks completely in two. You can pound day on the coin which this one is tended to succeed and not crack which seems to attest a superiority of coinage in favor of the old half dollar."

It is believed that the estimate of \$60,-00,000 which is made of the shares of his father's estate which John Jacob Astor received is under the mark. Upon the division of the property which William B. Aster left his two sons. William Astor's share was inventoried at about \$60,000,000, and while his family have lived expensively, yet they did not be-gin to spend his income, and although he did nothing to increase his wealth,

the young man receives that causes spe-cial interest. The rum is so large that a million either way is of little account.
The question which interests people here is what is John Jacob Aster going to do with his property? If he becomes, as his cousin William Waldorf has, a man of coustn William Waldorf has, a man of keen business instinct, he will have to change remarkably. He has one trait of the Astors perhaps more strongly de-veloped than it was in any of the others, and it is a truit which in some men would be called parsimoniousness. He is an extremely close figurer, and is of such disposition that when he secures a dollar he feels like making it a prisoner for life. Whether he branches out as a daring and conspicuous builder of real daring and conspicuous builder of real estate properties or not his fortune is certain to increase steadily, because no rich man in New York, not even Russell Sage, will figure more carefully over his expenditures, both personal and busi-ness, than John Jacob Astor will do.— New York Cor. It is not the amount, however, which imate expectation of every standard shoe house in good times, but we will sell. That is the cardinal principle of our business. We may be disappointed as to profits, but we must and will sell more every year than we did the year preceding. We know that we have advantages over all competitors in the matter of getting goods, know that we can own them cheaper, that we can sell them for the same price that the ordinary retailer buys them for and yet make a small margin. We are not asking for anything more now. Better come in and buy. We have the goods and the prices to make the sales if you can be induced to buy anything in shoes.

Here's What the Plasterers Think of ROCK PLASTER.

the has selected a well known resident of the south side, to whom he intends before he dies to impart the secret of the unattractive looking but most potent machine. The gentleman designated to the practical character of ROOK PLASTER, and while it to the practical character of ROOK PLASTER, and while it will remove a not inconsiderable amount of business, namely, that of patching, we advocate its use, as it enables us to de work and guarantee the results, and enables us to carry our trade at all seasons of the year, and modernizes that part of building enterprise which has undergone practically no improvement in the last two thousand years, placing the business of the plasterer on the same footing as that of pied by the other trades through the advent of mach and improved methods.
